Online Version

- Please note that the answers to the question slides in the presentation are highlighted in light blue on the next slide. The graph on the slide indicates how participants at the training responded to the question.
- This presentation is for educational purposes and **not** intended to represent legal advice. Consult your town attorney in matters concerning your town.

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Conditions

Conditions are requirements added to an approval that either mandate particular action by the applicant or impose limitations or restrictions on approved use/development

Examples-

- Condition that special permit use applicant must obtain DEEP approval of community wastewater system to serve multi-unit residential development
- Condition that sand and gravel removal operation authorized by special permit be limited to certain hours and days

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Modifications

Modifications are imposed to make the development proposal conform to the regulations

- Example- Subdivision application approved with the modification that portion of proposed road having an 18% grade be changed to 15% to comply with grade requirement of regulations

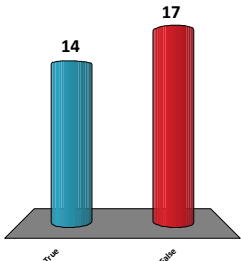

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Placing conditions on the approval of an application is a good way for the community to get something they ordinarily would not obtain under the regulations.

A. True

B. False

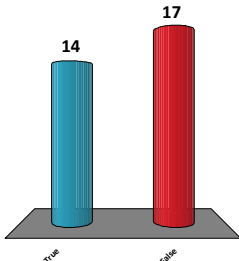

Placing conditions on the approval of an application is a good way for the community to get something they ordinarily would not obtain under the regulations.

A. True

B. False

Somewhat of a trick question. It really depends on the circumstances and what you have in your regulations

Center for Land Use Education and Research at the University of Connecticut

General limits on use of conditions

- **If permissible for a particular type of application, conditions must be logically and reasonably related to the purposes of the governing statutes and regulations.**
- **Regardless of whether statutes may allow condition for type of application, the local regulations govern-**
 - **Example- If regulations specifically require Health Department Approval prior to approval of site plan, Commission cannot approve with the condition that it be obtained later**

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Limits on use of conditions

- **Commissions should not approve an application subject to conditions to be named later.**
- **Risk automatic approval of site plan or subdivision if condition deferring approval to another agency can be seen as failure to act.**

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Limits on use of conditions

- **Conditional approval dependent on action by other agencies is usually improper unless evidence on record demonstrates that approval is a probability**
- **Where permit allowing use will not become valid until favorable action by other agency, as with a special permit, evidence of probability isn't necessary**

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Limits on use of conditions

The amount of discretion a commission has to modify or condition a development application depends on the type of permit sought

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Site Plans

- **CGS specifically provide that the relevant commission may approve, modify and approve, or deny an application but “only if it fails to comply with requirements set forth in the zoning or inland wetland regulations.”**

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Site Plans

- **Only conditions specifically authorized by statutes are those requiring a bond to secure any modifications of a site plan.**
- **Better for commissions to issue modified approval or, if modifications are substantial, instructions on how site plans must be modified to achieve compliance with the regulations.**

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Site Plans

Some conditions to site plans are generally permissible:

- **Examples:**
 - intersection improvements
 - Administrative conditions such as notice to planning staff before commencement of work, requirements imposing order of improvements (S&E controls prior to other site work), inspection reports, etc.

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Special Permits and Special Exceptions

- **Commission or board may deny application or approve it subject to “conditions necessary to protect the public health, safety, convenience and property values.”**
- **Conditions imposed must be authorized by the regulations and only in accordance with the standards set forth in the regulations**

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Special Permits and Special Exceptions

- **Courts have upheld use of fairly broad standards to deny a permit application but imposition of conditions are supposed to be based on more specific standards**
- **Conditions proscribing scope of use authorized only by special permit are usually enforceable**

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Variances

- **Although there is no express statutory right to impose a condition to a standard variance, the CT Supreme Court held that it is permissible**

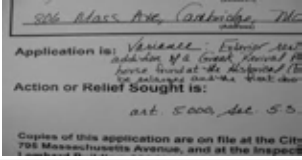

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Variances

- **Conditions are a means of minimizing conflict of variance with zoning regulations**
- **Conditions must relate to use being proposed**

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Appeals from ZEO

- **ZBA may reverse or affirm, wholly or partly, or modify the challenged order, requirement of decision of the ZEO**
- **Although titled an “appeal,” ZBA is actually making its own decision regarding compliance and has all the powers of the ZEO**

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Appeals from ZEO

- As with authority of the ZEO in issuing the initial enforcement decisions, ZBA decision on appeal can include reasonable conditions related to zoning compliance.

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Subdivision Applications

Subdivision statutes specifically allow commissions to modify applications

Courts are reluctant to approve conditions not directly related to requirements of regulations or assurances of compliance with regulations

- Such "conditions" may really be "modifications." When a condition is needed to make the subdivision plan conform to the regulations, it is really a modification.

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Subdivision Applications

- Conditions that address issues outside the scope of the regulations are likely to be held illegal by the courts

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Subdivision Applications

Common conditions of subdivision approval:

- Improvements to adjacent streets and drainage when necessitated by development
- Dedication of land for open space
- Payments in lieu of open space
- Bonds
- Sequencing of work- ex. - E&S controls installed prior to construction

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Inland Wetlands and Watercourses Applications

- IWWC may grant, deny or limit any permit application for a regulated activity
- May approve with whatever "terms, conditions, limitations or modifications" deemed necessary to carry out the policy of Inland Wetlands and Watercourses Act.

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Inland Wetlands and Watercourses Applications

Conditions may include reasonable measures to mitigate impacts of the regulated activity which would:

- Prevent, minimize pollution or other environmental damage
- Maintain or enhance existing environmental quality
- In following order of priority: restore, enhance, create productive wetland or watercourse resources

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Inland Wetlands and Watercourses Applications

Conditions may include:

- In some cases, offsite wetlands enhancements or mitigation
- Drainage modifications
- Buffers and conservation area signage
- Recording of conservation easement containing limitation on activities allow in conservation area

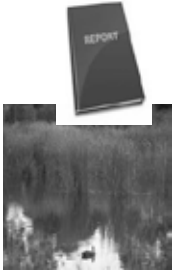

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Reports from IWWC

- filed concurrently (or previously) with IWWC
- May extend time period to allow for IWWC review
- May not make final decision until receipt of IWWC report
- Must give due consideration to IWWC "report"

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Coastal Site Plans

- May be approved, conditioned or denied in accordance with the broad policy considerations set forth in the Coastal Area Management Act (CAM)

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Coastal Site Plans

- CAM supplements other land use regulations and may increase authority of Planning Commission to impose conditions on Subdivision application.
- Conditions must be based on appropriate standards and criteria

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Amendments to Regulations

- Generally inappropriate for a commission to place conditions on an amendment to regulations
- Regulations must be for general applicability and are not suited for individual conditions
- Modifications may be permissible- key is whether public is on notice of substantive change in proposed regulation

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Conditional/final subdivision approval

Regulations can provide for conditional subdivision (as distinct from subdivision approval with conditions imposed)

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Conditional subdivision approval

Subdivider is not required to post security for public improvements-

Final subdivision approval issued when:

- 1) work is completed and approved; or,**
- 2) security is provided**

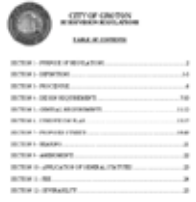

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Bonding Requirements

Authorization to require bonds must be included in regulations

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

PA 11-79: Bonding requirements

Applies to site plan and subdivision approvals:

- Limits form of security
- Limits types and amount of permissible bonding
 - Post-acceptance maintenance bonds are impermissible
- Imposes deadlines for release

Bond, Performance Bond

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

PA 11-79: Bonding requirements

Form of bond:

“

passbook or statement savings accounts and other surety including, but not limited to, letters of credit, provided such bond or surety is in a form acceptable to the commission and the financial institution or other entity issuing any letter of credit is acceptable to the commission”

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

PA 11-79: Bonding requirements

Posting bonds:

- Can be posted anytime prior to completion of construction, except commission can require posting prior to commencement E&S
- Lot can't be sold unless all security posted
- Each phase of subdivision must be treated as separate subdivision for purposes of bonding

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

PA 11-79: Bonding requirements

Release of bonds:

On request for bond release or reduction, Commission must within 65 days either:

- release/reduce the bond;
- or provide a written explanation of uncompleted work

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

PA 11-5 – permit expiration

Site plan, Subdivision and Wetlands approvals

- **If approved prior to July 1, 2011 and not expired:**
 - **Site plan, standard subdivision plans and wetlands permits-**
 - Effective for 9 years after date of approval
 - Extensions up to 14 years after approval
 - **Subdivisions over 400 units**
 - Effective for 14 years after date of approval

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Subdivision enforcement

Principal enforcement tool is bonding

- **Obligation to call bond upon expiration of final subdivision to serve lots that have been sold**
- **No subdivision enforcement officer**
- **Limited rights of subdivision enforcement actions are becoming recognized by courts**

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Waivers

- **When are they appropriate?**
 - **Function of specific standards of regulations**
 - **No authority to waive unless specific standards are followed**
 - **Precedent- need sound factual/legal basis to treat applications differently in issuing waivers**

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Practical Consideration

Does it hurt to ask?

Unless directly prohibited by public policy, if applicant agrees to condition or doesn't appeal the condition, the condition is enforceable even if arguably beyond what could be mandated by commission

Upjohn Co. v. Zoning Bd. of Appeals, 224 Conn. 96 (1992)

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Center for Land Use Education and Research at the University of Connecticut

Practical considerations

Is the condition "integral" to approval?

If found to be impermissible on appeal, court may:

- **Strike it and order approval or,**
- **If a condition is integrally related to approval and commission had discretion to deny, court should remand to commission to consider denial or another proper condition**

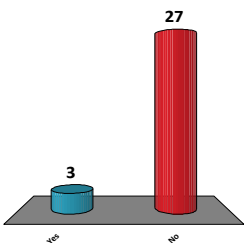

Your decision could make clear that condition is essential to approval

© University of Connecticut. The University of Connecticut supports all state and federal laws that promote equal opportunity and prohibit discrimination.

Is it appropriate: Condition a variance to allow year-round use to an owner for her life?

A. Yes
B. No

Response	Count
Yes	3
No	27

Center for Land Use Education and Research at the University of Connecticut

Condition to variance allowing year-round use to owner for her life

NO
Zoning applies to conditions of land and can't be unique to owner the property.

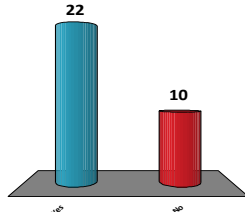

Reid v. Zoning Bd. of Appeals, 235 Conn. 850, 858 (1996)
